OCIO LINK

Smart Connectivity for Advanced Tank Monitoring

OCIO LINK is PIUSI's **new intelligent solution** designed to bring tank monitoring systems to the next level. **Fully compatible** with **OCIO and OCIO 2.0**, it enables seamless integration, remote control, and real-time data access through a simple and scalable architecture.

HOW IT WORKS

OCIO LINK acts as a **smart communication hub**, connecting up to four Ocio devices to the Internet—including **mixed configurations** of OCIO and 2.0—via **LAN, WiFi, or 4G**.
All data is transmitted to a **cloud-based Web App**, allowing users to monitor tank levels, manage configurations, and access system information anytime, from any device.

WHY OCIO LINK

OCIO LINK transforms traditional tank monitoring into a CONNECTED, SMART, and FUTURE-READY SYSTEM.

1. **UPGRADE WITHOUT REPLACEMENT** - Enhance existing OCIO and 2.0 systems without replacing installed devices.
2. **NEW MOBILE-READY WEBAPP** - Access your system from any device with a fully mobile-optimized Web App, ensuring seamless remote monitoring and management wherever you are.
3. **FULL CONTROL OVER DATA TRANSMISSION** - Set reporting frequency based on your needs (5–120 minutes) or trigger updates on demand.
4. **MULTI-DEVICE EFFICIENCY** - Connect up to 4 OCIO units, including mixed configurations, within a single system.
5. **MAXIMUM CONNECTIVITY FLEXIBILITY** - Choose between LAN, WiFi, or your own SIM with no mandatory subscriptions.

KEY FEATURES

FEATURES	Description
Multi-device connectivity	Connect up to 4 Ocio units (OCIO and 2.0) within a single network
Cloud-based Web App	Remote monitoring, configuration, and system management
Real-time notifications	Alerts via Email and browser
Flexible connectivity	LAN, WiFi, or 4G connection options
Integrated GPS	Location tracking
Configurable data transmission	Selectable frequency (5–120 minutes) and on demand
SIM card flexibility	Use any standard SIM card
One SIM for multiple devices	Single SIM supports up to 4 OCIO devices
Secure architecture	Advanced cybersecurity-compliant registration and data management
OTA updates	Over-The-Air updates for security patches and system improvements
